To achieve food sovereignty, agroecology and biocultural diversity, there is a need to re-imagine and construct knowledge for diversity, decentralisation, dynamic adaptation and democracy. The authors critically explore the changes in organizations, research paradigms and professional practice that could help transform and co-create knowledge for a new modernity based on plural definitions of wellbeing.

‘Food sovereignty, agroecology and biocultural diversity’ is published by Routledge (2018). Order your copy here. What others say about this book: “This important book shows both how agroecology can democratize knowledge, and how democratizing knowledge in turn is a condition for agroecology to develop. We tend to reduce agroecology to a set of agronomic techniques that reduce the need for external inputs, that de-link food production from energy consumption, and that restore soil health.”
