In Photographing Shadow and Light, Joey lifts the curtain on his dramatic, creatively fearless approach to portraiture, sharing his personal philosophy and a behind-the-scenes look at 15 striking photo sessions—from personal projects shot in Africa, India, and Brooklyn to commercial shoots for 50 Cent, the Jonas Brothers, and Project Runway All Stars. Joey provides readers with a step-by-step description of how he visualized each shoot, formed meaningful connections with his subjects, and ...

Soft, diffused light gives shadows soft, feathered edges that recede gently (dither away), making it flattering and versatile for human subjects for the way it minimizes texture and detail (i.e., flaws). The angle and direction of the light you choose depend on your shooting style and your intent for the image or session.

Careful organization and clear, detailed proofs characterize this methodical, self-contained exposition of basic results of classical algebraic number theory from a relatively...
Photographing Shadow and Light: Inside the Dramatic ...
Light and shadow photography is when you take a photo of the darkness or diminished light caused by the blocking of a light source. As seen in the pic to the right. This is a photo of a girl all alone being covered in the darkness and a single ray shining down upon her. I choose this photo as an example.

Photographing Shadow and Light: Inside the Dramatic ...
The Characteristics of Shadows. Every beginning photographer is taught about the qualities of light: soft light, hard light, broad light, spot light, etc. Shadows also exhibit similar characteristics. A shadow can be deep in tone and have a hard defined edge.

How to Get Amazing Images from Shadows ... - Light Stalking
For indoor photography, a tripod allows stability that helps prevent motion blur in any shutter speed or longer exposure. In low-light indoor photography, you can capture fixed subjects using a long exposure set-up to enhance the light sources and compensate shadow-light proportion. Learning photography has never been easier...

Tips on How to Avoid Shadows in Indoor Photography: A ...
All of the shutters are opened to let in ample light. It is an overcast day, so the light is soft. Because the light is coming from only one direction, it is directional light. The light is perpendicular to the subject, which creates a split lighting scenario. Notice how half of her face is lit, the other half is in shadow.

Speed Light Photography for Beginners
Hard light gets a bad rep — used incorrectly, hard light will create dark shadows under the eyes in a portrait, for example. But, hard light tends to create more contrast in an image. Hard light can be combined with the position of the light to avoid shadowy eyes and create drama inside a portrait.

The Ultimate Guide to Learning Photography: Lighting for ...
Well, it depends on if the shadow is being created due to a specific angle of the speed light or you’re using some sort of a flash diffuser. A lot of photographers assume that the omni dome diffuser you get with your speed light is essential to making the light softer, which is not always true.

How to Use Dome Diffuser to Eliminate Shadows and Harsh Light

I am very proud to announce that today my book was released for sale in stores and online. Introducing: Photographing Shadow and Light: Inside the Dramatic Lighting Techniques and Creative Vision of Portrait Photographer Joey L. Um... That’s a freaken long title... I admit- the book’s subtitle is shamelessly keyword-heavy on purpose, but you get the idea.
